

ELECTRICITY AT WORK REGULATIONS (1989)

Introduction:

Safety at work is the responsibility of employees alike and acceptance of this responsibility is fundamental to ensure safe working practice. The Electricity at Work Regulations 1989 came into force on April 1990. The Health and Safety at Work Act 1974 requires all employers, employees and suppliers to be responsible for the maintenance, servicing and installation of electrical equipment or services. This program is intended for any personnel involved with any kind of electrical work in the workplace.

Objective:

To assist employers and employees to gain knowledge and understanding necessary to satisfy the requirements of the regulations
