

FAILURE MODES AND EFFECTS ANALYSIS (FMEA's)

Introduction:

Successful (FMEA's) depend on the knowledge and experience held by the team members. Selection for this programme should therefore be based on an individual's ability to contribute design, product or manufacturing experience.

Objectives:

To provide delegates with formal method of identifying potential problems, thus enabling suitable corrective action to be taken in advance. Prevention not detection

Programme Synopsis:

- Design v Process
- Selection of part and process
- Documentation
- Design F.M.E.A
- Process F.M.E.A.
- Ranking methods
- Identification of risks
- Corrective actions
- Company based project

Duration: Two (2) days

Course Code: TSCFMEA

Certification: Training Solutions 2000
