

WORKING AT HEIGHTS

Introduction:

Many home and work injuries involve falls from height. Falls from height account for around to fatalities and 4,500 major injuries in the workplace each year. The working at height regulations were implemented in April 2005.

The main aim of the regulations is to reduce deaths and injuries caused by falls from height.

Objective:

To introduce delegates to the principal requirements of the regulations to enable them to comply with and fulfil their duties under the legislation.

Programme Synopsis:

- Introduction
- Requirements of Regulations
- Safe use of: -
 - Ladders
 - M.E.W.P.S
 - Scaffold
 - Tower Scaffold
- Working safely on roofs
- Safety precautions
- Safety equipment
- Summary
- Close

Duration: One Day

Course Code: TSCWAH2

Certification: Training Solutions 2000
